

KATHERINE GSHAWG

WORK EXPERIENCE

Knack

Senior Product Engineer // May 2019 - Present

First specialized front end engineer on a 100% remote team of full stack engineers. Guide and teach wider adoption of Vue principles and techniques among the dev team, enable documentation of Vue components and `vue-test-utils` unit testing. Establish and implement a CSS style-guide with a consensus-driven class naming convention and sassDoc documentation. Interview and hire further front end engineers to support new software release. Work directly with product designer to scope and implement features and iterative improvements based on user feedback.

HospitalQ

Software Engineer // November 2017 - May 2019

Member of a 100% remote team focusing on frontend improvements of hospital efficiency and data predictive software. Assist in conversion from custom JS framework based loosely on backbone in a gulp ecosystem, to modular ES6 classes utilizing Vue and webpack. Build interfaces consuming large API responses of complex data displayed in visually appealing ways.

DuckDuckGo

Snr Front End Developer // September 2017 - November 2017

Work as a senior member of the search team leading a rewrite project of the maps interface in a custom MVC javascript application and the latest WebGL Mapbox Technology.

WEB ADVANCED

Front End Developer // September 2015 - August 2017

Lead Front End Projects for a variety of large clients. Scaffold and build solutions working with a strong team of Frontend and Backend Developers on large scale websites and web apps working closely with Design & UX to bring their vision to life. Develop and maintain project starter boilerplate and implement Front End Department documentation procedures, code review and onboarding program.
